# CONTENTS OF VOLUME 232

Number 1, March 6, 1997

|                                                                                                                                                                                                       |                                                                                                                                                     |    |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Transforming Growth Factor $\beta$ Is a Modulator of Platelet-Derived Growth Factor Action in Vascular Smooth Muscle Cells: A Possible Role for Catalase Activity and Glutathione Peroxidase Activity | Eisuke Nishio and Yasuhiro Watanabe                                                                                                                 | 1  |
| Molecular Cloning of Human <i>GRB-7</i> Co-amplified with <i>CAB1</i> and <i>c-ERBB-2</i> in Primary Gastric Cancer                                                                                   | Tatsuya Kishi, Hiroki Sasaki, Nobu Akiyama, Tomoki Ishizuka, Hiromi Sakamoto, Shigeo Aizawa, Takashi Sugimura, and Masaaki Terada                   | 5  |
| Mapping the Minimal Domain of hMSH-2 Sufficient for Binding Mismatched Oligonucleotides                                                                                                               | Adrian Whitehouse, Jayne Deeble, Graham R. Taylor, Pierre J. Guillou, Simon E. V. Phillips, David M. Meredith, and Alexander F. Markham             | 10 |
| Characterisation of DNA Binding and Transcriptional Regulatory Function of an Endogenous Mutant p53 in MDA-468 Human Breast Cancer Cells                                                              | K. A. Nagendra Prasad and Jon G. Church                                                                                                             | 14 |
| Fas/APO-1(CD95)-Induced Apoptosis of Primary Hepatocytes Is Inhibited by cAMP                                                                                                                         | Kari E. Fladmark, Bjørn T. Gjertsen, Stein O. Døskeland, and Olav K. Vintermyr                                                                      | 20 |
| Protein Glycosylation in a Heat-Resistant Rat Fibroblast Cell Model Expressing Human HSP70                                                                                                            | Kurt J. Henle, Sunita M. Jethmalani, Ligeng Li, and Gloria C. Li                                                                                    | 26 |
| Low Micromolar Levels of Hydrogen Peroxide and Proteasome Inhibitors Induce the 60-kDa A170 Stress Protein in Murine Peritoneal Macrophages                                                           | Tetsuro Ishii, Toru Yanagawa, Koichi Yuki, Tetsuya Kawane, Hiroshi Yoshida, and Shiro Bannai                                                        | 33 |
| Mutations of the <i>INK4a</i> Locus in Squamous Cell Carcinomas of Human Skin                                                                                                                         | Yoshiaki Kubo, Yoshio Urano, Kazuya Matsumoto, Kamrul Ahsan, and Seiji Arase                                                                        | 38 |
| The Mutagenicity of the Tyrosine Metabolite, Fumarylacetoacetate, Is Enhanced by Glutathione Depletion                                                                                                | Rossana Jorquera and Robert M. Tanguay                                                                                                              | 42 |
| Isolation of Diabetes-Associated Kidney Genes Using Differential Display                                                                                                                              | Rachel Page, Ceri Morris, John Williams, Chris von Ruhland, and Afshan N. Malik                                                                     | 49 |
| Oligomerization Is Not Essential for Growth Suppression by p53 in p53-Deficient Osteosarcoma Saos-2 Cells                                                                                             | Chikashi Ishioka, Hideki Shimodaira, Christoph Englert, Akira Shimada, Motonobu Osada, Li-Qun Jia, Takao Suzuki, Makio Gamo, and Ryunosuke Kanamaru | 54 |
| Interleukin-11 Induces Rapid PKC Activation and Cytosolic to Particulate Translocation of Alpha and Beta PKC Isoforms in Human Erythroleukemia K562 Cells                                             | Glendora C. Spencer and Samuel E. Adunyah                                                                                                           | 61 |
| Regulation of Aquaporin-2 Gene Transcription by GATA-3                                                                                                                                                | Shinichi Uchida, Yoshihiro Matsumura, Tatemitsu Rai, Sei Sasaki, and Fumiaki Marumo                                                                 | 65 |

|                                                                                                                                                                                                  |                                                                                                                            |     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------|-----|
| A Novel Mutation Which Enhances the Fluorescence of Green Fluorescent Protein at High Temperatures                                                                                               | Yukio Kimata, Masaharu Iwaki, Chun Ren Lim, and Kenji Kohno                                                                | 69  |
| Hypotonicity and Thrombin Activate Taurine Efflux in BC <sub>3</sub> H1 and C <sub>2</sub> C <sub>12</sub> Myoblasts That Is Down Regulated during Differentiation                               | Vangelis G. Manolopoulos, Guy Droogmans, and Bernd Nilius                                                                  | 74  |
| Calcium-Dependent <i>c-myc</i> Proto-Oncogene Expression and Proliferation of CACO-2 Cells: A Role for a Luminal Extracellular Calcium-Sensing Receptor                                          | Enikő Kállay, Olga Kifor, Naibedya Chattopadhyay, Edward M. Brown, Martin G. Bischof, Meinrad Peterlik, and Heide S. Cross | 80  |
| Voltage-Dependent Effect of Al <sup>3+</sup> on Channel Activities in Hippocampal Neurons                                                                                                        | Marie Kanazirska, Peter P. Vassilev, Sarit Y. Birzon, and Peter M. Vassilev                                                | 84  |
| Competitive Inhibition of Nitric Oxide Synthase by <i>p</i> -Aminobenzamidine, a Serine Proteinase Inhibitor                                                                                     | Giorgio Venturini, Enea Menegatti, and Paolo Ascenzi                                                                       | 88  |
| The Production and Purification of Functional Decorin in a Baculovirus System                                                                                                                    | Jianguo Gu, Yoshiko Nakayama, Kaoru Nagai, and Yoshinao Wada                                                               | 91  |
| A Point Mutation in the Glucose-Dependent Insulinotropic Peptide Receptor Confers Constitutive Activity                                                                                          | Chi-Chuan Tseng and Li Lin                                                                                                 | 96  |
| Molecular Cloning of ANTI-SS-A/Ro 60-kDa Peptide Fab Fragments from Infiltrating Salivary Gland Lymphocytes of a Patient with Sjögren's Syndrome                                                 | Hiroshi Suzuki, Hiroyuki Takemura, Motohiro Suzuki, Yasuo Sekine, and Heihachiro Kashiwagi                                 | 101 |
| Role of Na <sup>+</sup> /Ca <sup>2+</sup> Exchanger in Preventing Na <sup>+</sup> Overload and Hepatocyte Injury: Opposite Effects of Extracellular and Intracellular Ca <sup>2+</sup> Chelation | Rita Carini, Maria Grazia De Cesaris, Giorgio Bellomo, and Emanuele Albano                                                 | 107 |
| Epidermal Growth Factor Receptor Stimulation of Diacylglycerol Kinase                                                                                                                            | R. Bruce Montgomery, David K. Moscatello, Albert J. Wong, and William L. Stahl                                             | 111 |
| Glycosylation beyond the Asn78-Linked GlcNAc Residue Has a Significant Enhancing Effect on the Stability of the $\alpha$ Subunit of Human Chorionic Gonadotropin                                 | Carol W. E. M. van Zuylen, Johannis P. Kamerling, and Johannes F. G. Vliegenthart                                          | 117 |
| The <i>Schizosaccharomyces pombe gms1<sup>+</sup></i> Gene Encodes an UDP-Galactose Transporter Homologue Required for Protein Galactosylation                                                   | Mitsuaki Tabuchi, Naotaka Tanaka, Shojiro Iwahara, and Kaoru Takegawa                                                      | 121 |
| Identification of a Novel <i>Drosophila</i> Protein Kinase Highly Homologous to Protein Kinase N (PKN)                                                                                           | Nozomi Ueno, Isao Oishi, Shin Sugiyama, Yasuyoshi Nishida, Yasuhiro Minami, and Hirohei Yamamura                           | 126 |
| Conformational Transition of DnaA Protein by ATP: Structural Analysis of DnaA Protein, the Initiator of <i>Escherichia coli</i> Chromosome Replication                                           | Toshio Kubota, Tsutomu Katayama, Yuji Ito, Tohru Mizushima, and Kazuhisa Sekimizu                                          | 130 |
| Metallothioneins 1 and 2 Are Expressed in the Olfactory Mucosa of Mice in Untreated Animals and during the Regeneration of the Epithelial Layer                                                  | Stuart J. Skabo, Adele F. Holloway, Adrian K. West, and Meng Inn Chuah                                                     | 136 |

|                                                                                                                                                        |                                                                                                                                                   |     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Antagonist Binding Characteristics of the Ser <sup>311</sup> →Cys Variant of Human Dopamine D <sub>2</sub> Receptor <i>in Vivo</i> and <i>in Vitro</i> | Tiina Pohjalainen, Anibal Cravchik, Pablo V. Gejman, Juha Rinne, Kjell Någren, Erkkä Syvälahti, and Jarmo Hietala                                 | 143 |
| Deltoid Human Muscle MTDNA Is Extensively Rearranged in Old Age Subjects                                                                               | S. A. Kovalenko, G. Kopsidas, J. M. Kelso, and A. W. Linnane                                                                                      | 148 |
| Mesoderm Induction by BMP-4 and -7 Heterodimers                                                                                                        | Atsushi Suzuki, Eiji Kaneko, Junko Maeda, and Naoto Ueno                                                                                          | 153 |
| Identification and Characterization of a Novel Human Cortistatin-like Peptide                                                                          | Shoji Fukusumi, Chieko Kitada, Shiro Takekawa, Hideki Kizawa, Junko Sakamoto, Masaomi Miyamoto, Shuji Hinuma, Kazuaki Kitano, and Masahiko Fujino | 157 |
| Inhibition of Peroxynitrite-Mediated Tyrosine Nitration by Catechin Polyphenols                                                                        | AnanthSekher Pannala, Catherine A. Rice-Evans, Barry Halliwell, and Surinder Singh                                                                | 164 |
| Butyrate Stimulates Cyclin D and p21 and Inhibits Cyclin-Dependent Kinase 2 Expression in HT-29 Colonic Epithelial Cells                               | Samila Siavoshian, Herve M. Blottiere, Christine Cherbut, and Jean-Paul Galmiche                                                                  | 169 |
| FGF-8 Is Expressed during Specific Phases of Rodent Oocyte and Spermatogonium Development                                                              | Eeva Valve, Tarja-Leena Penttilä, Jorma Paranko, and Pirkko Härkönen                                                                              | 173 |
| Modulation of the Protein Kinase CK2 Activity by a Synthetic Peptide Corresponding to the N-Terminus of Its $\beta$ Regulatory Subunit                 | Emmanuelle Valero, Edmond M. Chambaz, and Claude Cochet                                                                                           | 178 |
| Superoxide Scavenging Activity of Erythromycin-Iron Complex                                                                                            | Hiroyuki Muranaka, Moritaka Suga, Keizo Sato, Kazuko Nakagawa, Takaaki Akaike, Tatsuya Okamoto, Hiroshi Maeda, and Masayuki Ando                  | 183 |
| Suppression of L-Histidine Decarboxylase mRNA Expression by Methyleugenol                                                                              | Bo-Kyung Shin, Eun-Hee Lee, and Hyung-Min Kim                                                                                                     | 188 |
| Wortmannin Enhances CPP32-like Activity during Neuronal Differentiation of P19 Embryonal Carcinoma Cells Induced by Retinoic Acid                      | Takeshi Mukasa, Yoriko Khoroku, Toshifumi Tsukahara, Mariko Y. Momoi, Ichiroh Kimura, and Takashi Momoi                                           | 192 |
| Molecular Cloning and Expression of cDNAs Encoding Rat Brain and Liver Cytosolic Long-Chain Acyl-CoA Hydrolases                                        | Junji Yamada, Takao Furihata, Noriko Iida, Takafumi Watanabe, Masakiyo Hosokawa, Tetsuo Satoh, Akimasa Someya, Isao Nagaoka, and Tetsuya Suga     | 198 |
| Role of the Fission Yeast nim1 Protein Kinase in the Cell Cycle Response to Nutritional Signals                                                        | Pascale Belenguer, Laetitia Pelloquin, Marie-Louise Oustrin, and Bernard Ducommun                                                                 | 204 |
| Evidence for the Activation of Myeloperoxidase by f-Meth-Leu-Phe Prior to Its Release from Neutrophil Granulocytes                                     | Matthias Zipfel, Thomas C. Carmine, Claudia Gerber, Dietrich Niethammer, and Gernot Bruchelt                                                      | 209 |
| Progesterone Binding to Plasma Membrane and Cytosol Receptors in the Amphibian Oocyte                                                                  | Gene A. Morrill, Gui-Ying Ma, and Adele Kostellow                                                                                                 | 213 |
